

RISK ASSESSMENT FOR BRING YOUR TEENAGER TO WORK

The Management of Health & Safety at Work Regulations 1999 places a legal duty on employers to carry out risk assessments, and to make a written record if there are more than 5 employees.

COVID-19 adds a set of new hazards and risks to employees and/or workers, especially when at work, and as a result a risk assessment needs to be carried out with the aim of identifying sensible controls to reduce the risk that employees and/or workers are exposed to.

Likelihood: how likely is it that the harm presented by the hazard will actually occur?	Severity: what impact or damage could the harm presented by the hazard have on a person or persons?
High (3): Harm is certain, or near certain, to occur	High (3): Death or major injury
Medium (2): Harm will often occur	Medium (2): 7-day injury or illness
Low (1): Harm will seldom occur	Low (1): All other injuries or illnesses

Risk rating: Once the likelihood and severity have been determined, the risk can be calculated as shown below:			
	Likelihood		
Severity	3	2	1
3	High	High	Medium
2	High	High	Medium
1	Low	Low	Low

Haz No	Significant Hazards Look only for hazards which you could reasonably expect to result in significant harm	People affected	Risk rating L x S = R			Control measures e.g. physical safeguards, training, PPE etc	Residual risk rating L x S = R		
			L	S	R		L	S	R
